

Amendments to the Specification

Please replace the paragraph on page 1, with the following rewritten paragraph:

[0001] This application is related to the following copending and commonly assigned patent applications, which are incorporated herein by reference in their entirety:

“Method, System, and Program for Generating a Workflow”, having attorney docket no. STL920000094US1, and Serial No. 09/894,074, and filed on June 28, 2001;

“Method, System, and Program for Using Objects In Data Stores During Execution of a Workflow”, having attorney docket no. STL920000095US1, and Serial No. 09/894,413, and filed on June 28, 2001;

“Method, System, and Program for Executing a Workflow”, having attorney docket no. STL920000099US1, and Serial No. 09/894,076, and filed on June 28, 2001;

"Method, System, And Program For Enabling Access to a Plurality of Services", having attorney docket no. STL920000090US1, and Serial No. 09/918,185; and

“Method, System, and Program for Transferring Data from an Application Engine”, having attorney docket no. STL920000096US1, and Serial No. 09/918,204, and filed on the same date herewith.

Please replace the paragraph on page 6, with the following rewritten paragraph:

[0016] A workflow builder 20 comprises a system including a buildtime program 22 that implements a plurality of graphical user interface (GUI) panels in which a user may define the components of a workflow model 24. A workflow translator 26 converts the workflow model 24, with the defined workflow components, into a workflow definition language (WDL) file 10 that implements the workflow model 24. The workflow definition language (WDL) may comprise the FlowMark Definition Language (FDL), Workflow Process Definition Language (WPDL) or any other workflow definition language known in the art that is used to define workflows. The workflow translator 24 26 would transfer the WDL file 10 to the workflow server 6 to transform into a process template 8 in the runtime database 4 in a manner known in

the art. Further details of using the buildtime program 22 to build workflows are described in the copending and commonly assigned patent application "Method, System, and Program for Generating a Workflow", having docket no. ~~STL920000044US1~~ STL920000094US1, and Serial No. 09/984,074, which application was incorporated herein by reference above.
